Bringing joy to the garden

Over 700 high-quality wooden
products by Palmako

Isabella 14,7 m²

Dear Customer,

Life around us may change, but there are certain things in our lives that stay the same. There might be bad weather, lazy days feeling like doing nothing, communication errors, exhausting workdays or anything else that needs firmly our attention, our home and garden still need to be taken care of after all.

Gardens are one of many opportunities to express ourselves, it combines our hobbies in a best way for us. The only thing we need to do is understand what we want, what we need, what matters to us in the garden. Being outside and breathing fresh air is a great benefit.

Thinking about your garden, does it need a makeover or some update? We can help with that. Palmako's product range is very wide, starting from classical garden houses until modern cabins with sliding doors and finishing with saunas, sheds, garages, carports, fence panels, garden furniture and many more products to discover.

Maybe you need a new pavilion with a panoramic view out of the windows where you can eat dinners or lunch in spring or summer with your loved ones, watching your kids playing in the playhouse or playground. Or are you dreaming of a cozy sauna evening in your garden? We have a wide range of different saunas to choose from. Does the old carport or garage need to be replaced with a newer one, or perhaps you need a bigger shed where you can store your things. Some flowerboxes on the terrace, bordering with elegant fence panels for more privacy give the final touch to your garden. We have all these products in our wide selection.

Perhaps you have noticed that the catalogue in your hands is quite heavy. Our product range is very wide, this is why we have organized our products by categories on the side of the catalogue so you can

easily find what you are looking for. Our products are made of the finest Nordic spruce, which is known worldwide for its excellent properties. As wood is a renewable material, binding into it a remarkable quantity of CO² while growing, then by purchasing our products you are helping to support sustainable environmental-friendly attitudes and do at least a little good to our planet.

Wood is a natural material and to enjoy our products in the garden for a long time you will need to protect the wooden product against weather effects, wood-destroying fungi and insects. Therefore, we truly recommend using our product treatment service. Depending on the product type we are able to dip, pressure-treat or paint our products (initially in white or grey colours). Please read more about treatment possibilities on pages 362-368.

We continually appreciate your feedback regarding our products and services and we are eager to know how you have used them. You are welcome to share your ideas, proposals and photos via social media with [#palmako](#) [#bringjoytothegarden](#) or share them privately with us by sending an e-mail to palmako@palmako.ee or via our homepage www.palmako.ee.

We wish all our customers and consumers an exciting and productive 2025!

Ingrid Lamp

The joy of being in the garden

The garden – our connection with nature

We live our lives at crazy speeds amid droves of people and every day we become increasingly more alienated from nature. Going outdoors takes time and money and is an all around taxing experience. However, our ancient selves don't want to stop smelling the grass in the morning or seeing the light of the setting sun through tree branches. When we go back to the past along this line of heritage, we quickly reach our predecessors, who were peasants,

cattle breeders or hunters. Urbanisation is a new phenomenon in human history. A garden is often our last direct point of contact with nature, a reminder of the unity our predecessors felt with the surrounding environment. This feeling is deeply rooted in our subconscious and it makes the existence of a garden and time spent there so important for us.

The joy of being in the garden

We all strive to achieve ever-greater quality of life. Constantly juggling mountains of work and the need to spend time with our family forces us to look for balance between home and office, between reaping and sowing. It motivates us to emphasise our presence.

Our restless spirit and modern life force us out of our comfort zone – searching for greater value in life through social interaction and self-realisation.

Palmako doesn't build an artificial world with fake emotion and fake people. In the shape of the garden, Palmako extends quality living space, making it a special place in people's lives. Somewhere they live their real lives. A life which has meaning. Which is filled with quality time spent together, which we share with those closest to us. Somewhere we experience special moments.

We don't just make garden houses. We don't restrict ourselves to comprehensive garden solutions either.

We bring joy to the garden.

A garden is often our last direct point of contact with nature, a reminder of the unity our predecessors felt with the surrounding environment.

The many dimensions to garden life

The special moments in our lives are different and the roles gardens play in our lives are also different. A garden can be a place of relaxation where you hide from the world. Or it can be a meeting place where you discuss life with your loved ones. A garden can be the place where you devote yourself to your hobbies.

Every material has its character and soul. Wood is warm and beautiful and we understand its life cycle.

A beautiful garden can be our best feature for impressing neighbours and passers-by. It can also be a practical place for growing organic fruit and vegetables for our own use. We believe that quality time has many angles and colours, like an eventful life. We do not make decisions for garden owners; we simply do our best to turn their gardens into special places where moments are inspiring and different, just like people. The more varied our garden is the more joy it brings us.

Timeless garden wood

We have used wood to build our houses and gardens since ancient times and it has accompanied us throughout the centuries of our development. Every piece of wood has its own character and soul. Wood is warm and beautiful and we understand its life cycle. Like us, trees move in a circle of life, growing and living in the

time given to them. The constantly repeating cycle makes wood a renewable resource and using resources responsibly is increasingly more important in the context of growing environmental issues. Wood produced through correct and fair management is undoubtedly one of the best choices of our time. Wood is timeless – ancient and familiar on the one hand, and a building material with a clear future on the other.

New this year

The way we need every now and then some new ideas or things in our lives, so too does your garden! Bringing into the garden something new, maybe rearranging it or adding a new product makes us value more the joy the garden brings. Our product development team has been working hard during the last years and has some new and exciting products to share with you.

To find new products quickly, just follow the sign „NEW!“ in brown squares next to the product and yellow circles in the index and check the product overview pages in front of every product category.

There are many newcomers in the Gable roof cabins category. The Irene family is complemented by the two new cabins with a large canopy roof in different sizes – **Irene 19,0+16,2 m²** and **Irene 19,0+33,2 m²**. The Claudia cabin family has grown by three new models - **Claudia 14,2 m²** and with a lower total height **Claudia Pent 11,5 m²** and **Claudia Pent 19,4 m²**. We also launched a new gable roof house family called Amanda! We have here Amanda houses with and without canopy roof – **Amanda 11,2 m²**, **Amanda 17,1 m²**, **Amanda 11,2+7,8 m²** and **Amanda 17,1+7,8 m²** – all available with single (Slide) and double glazing (Slide Plus).

The Andrea cabins in the Flat roof cabins section have now got a little sister called **Andrea 7,5 m² Slide Plus**. This cozy cabin has one sliding door with 4-16-4 mm toughened double glass.

Welcome also to our new pent roof family named Cecilia in the Cottages category – **Cecilia 14,2 m²**, **Cecilia 21,8 m²**, **Cecilia 27,2 m²**, **Cecilia 30,0 m²** and **Cecilia 32,0 m²**, all available with 4-16-4 mm toughened double glass (Slide Plus). The doors and windows of Cecilia houses are from aluminium, colour RAL7016.

We have added **Melanie Low 7,0 m²** to our Pavilions series. with a lower total height than the other Melanies have. If you have been missing bright and spacious pavilions with aluminium doors and windows, have a look at our new Isabella family – **Isabella 10,9 m²**, **Isabella 14,7 m²** and **Isabella 22,2 m²**. The dark grey colour of the doors and windows suits well with any treatment.

The Sanna sauna family in the Garden Spa section has now a new model **Sanna 11,5 m²**. As of this year our Garden Spa category is complemented with modern cubic saunas – **Grace Sauna 5,3 m²** and **Grace Sauna 8,2 m²**. These glue laminated wall panel saunas have aluminium doors and windows with smokey glass. We surprise you with another sauna – **Sarah 3,8+2,1 m²**. This sauna cube with

aluminium windows and smokey glass suits well into a modern garden.

In the Palmako Connect product series there are now Bianca and Lenna pavilions with Slide Plus quality sliding doors - double toughened glass 4-16-4 mm.

The Roger family in the Garages section has widened by two new garages with large canopy roofs where to park your car or even two! Greet **Roger 19,0+16,2 m²** and **Roger 19,0+33,2 m²**, all available as kit without door, with wooden gate and with sectional door.

For a long time there has been no news in the Carports category. We have launched many new carports, starting from Roberts with new sizes – **Robert 23,1 m²** and **Robert 40,6 m²**. Some Robert and Karl carports are available now with a suitable shed! Have a look at all of them – **Robert 23,1 m² with shed** and **Karl 23,1 m² with shed** with one parking space, **Robert 40,6 m² with shed** and **Karl 23,1 m² with shed** with two parking spaces.

To meet the market demand of having a simple foldable kiosk that could be easily and quickly put together and disassembled, we have come out with a folding kiosk **Marian 6,2 m²**. This kiosk in the Shed category includes a waterproof PVC canvas as roof covering material.

Looking at the fence category, you will find a new fence element **Kamilla 10** and **gate**, both available as white painted. Have a look at also on the round fencing pages, we added new **Postsaver protected posts**, **Premium machine rounded posts and poles** with different diameters and lengths. In case you need **wooden screws with hot dip** heads to complete the assembling of fencing, we have these in our product range.

Among Gardening & Other category two new **log rolls with 50 mm diameter** are now available to bring more joy to you when gardening.

For the first time in product development history we offer timber **foundation frames** cut to size, all in brown dip treatment, including metal adjustment brackets. Another news in the Optional Products category is a new **self-adhesive EPDM** – one side of this EPDM is fully adhesive. One roll is 1,5 m wide and 10 m long.

We welcome all the new products in our Palmako product family and hope you have a better overview of our news to start renewing your outdoor living area.

Palmako is a part of the Lemeks Group

Lemeks AS was founded in 1993 with an aim of creating a modern forest stocking company systematically covering the whole country and on the basis of which a timber industry could be established that values local timber.

Today the Lemeks Group has developed into the biggest forestry company in Estonia that is funded by Estonian capital and operates successfully in the sphere of timber processing and forest stocking as well as in agriculture.

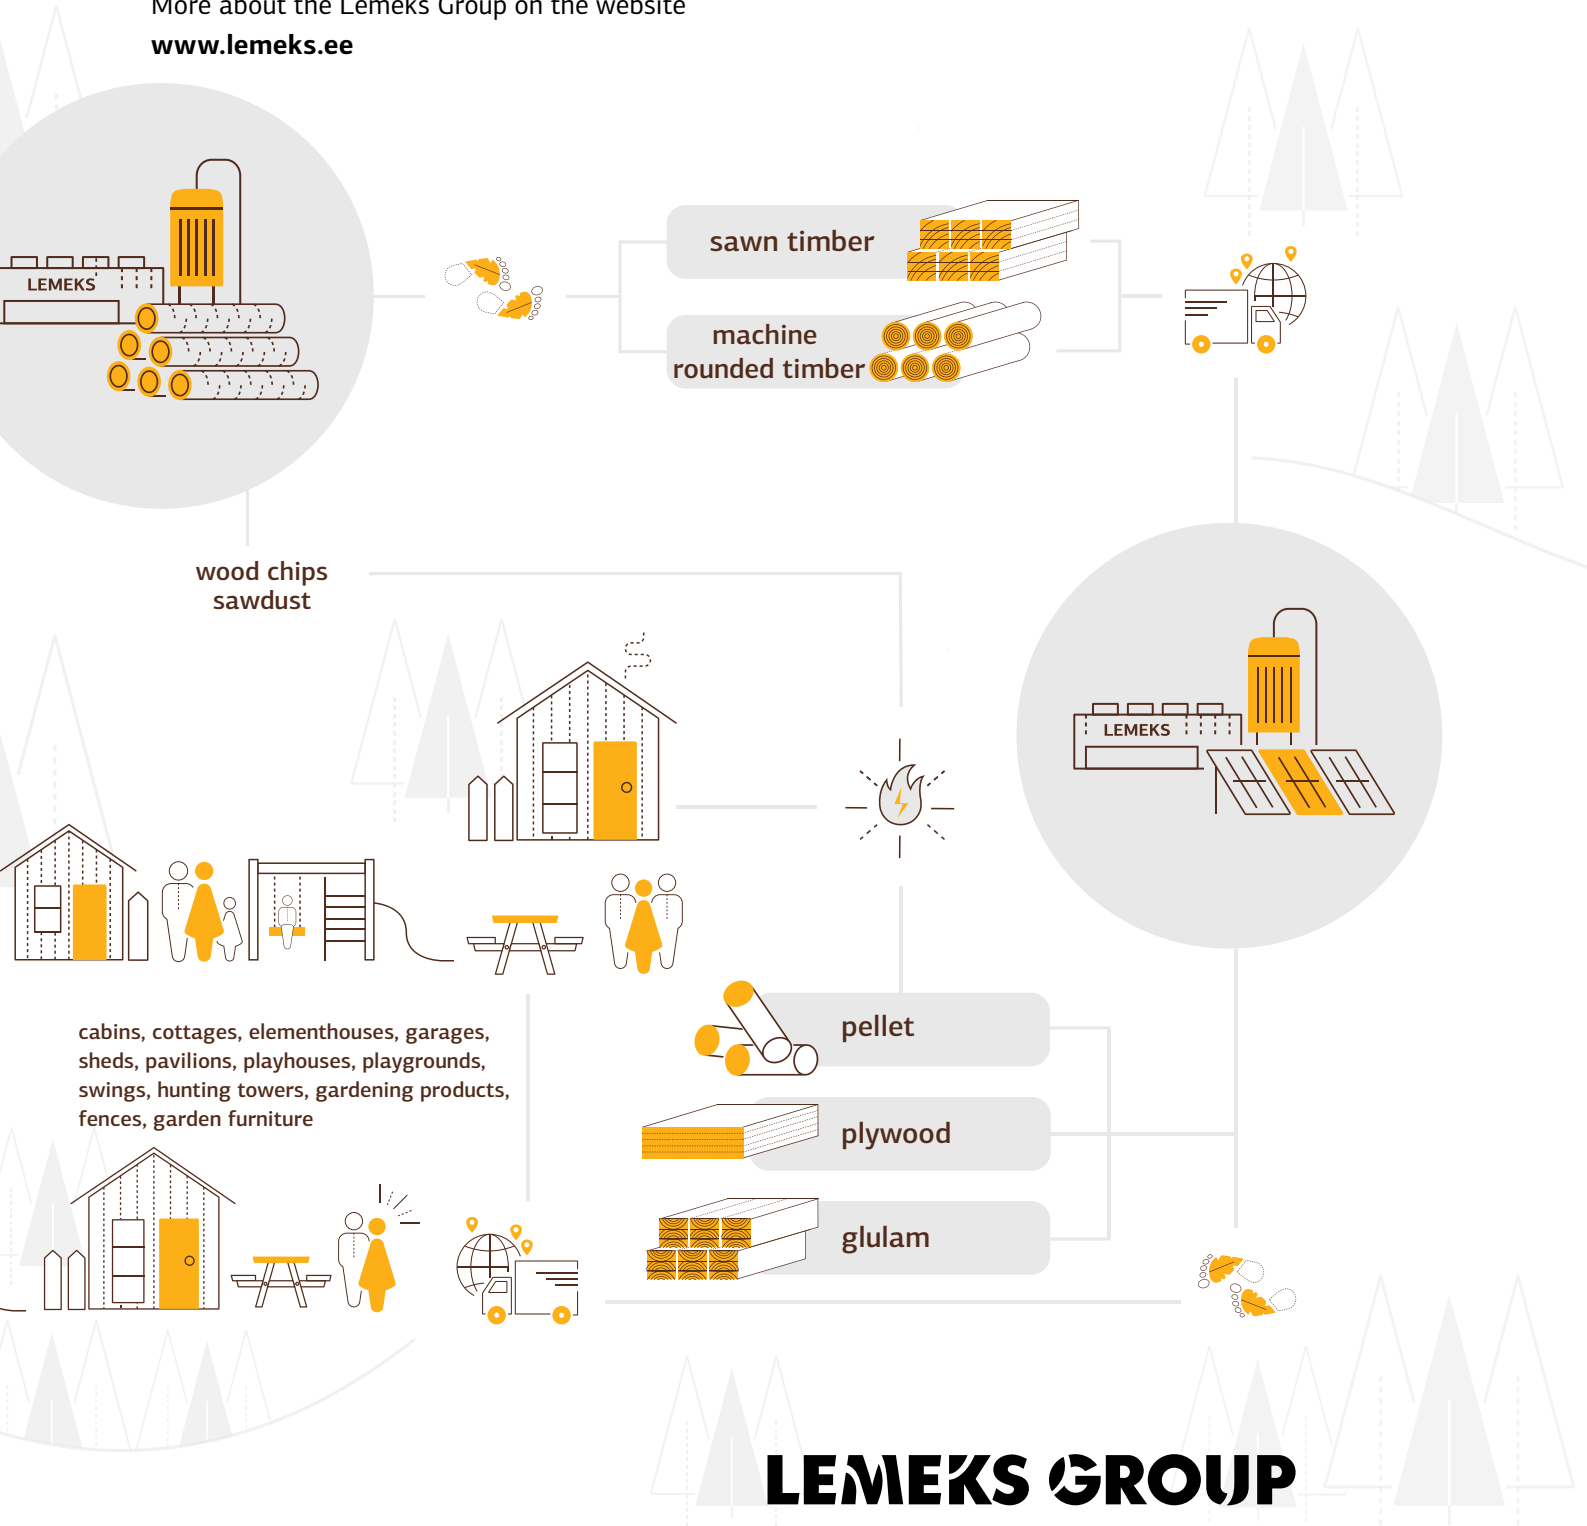

Timber value-added chain

35 subsidiaries and related companies provide employment to more than 1000 people in Estonia, Latvia, Germany, Sweden, Norway, France, Spain, United Kingdom and the United States of America. Belonging to the Lemeks Group provides Palmako support in financial management and IT. It also gives an excellent opportunity to share valuable information and experience with other specialists in the same field. The existence of belonging to the group's value chain ensures the supply of raw material even during harder times.

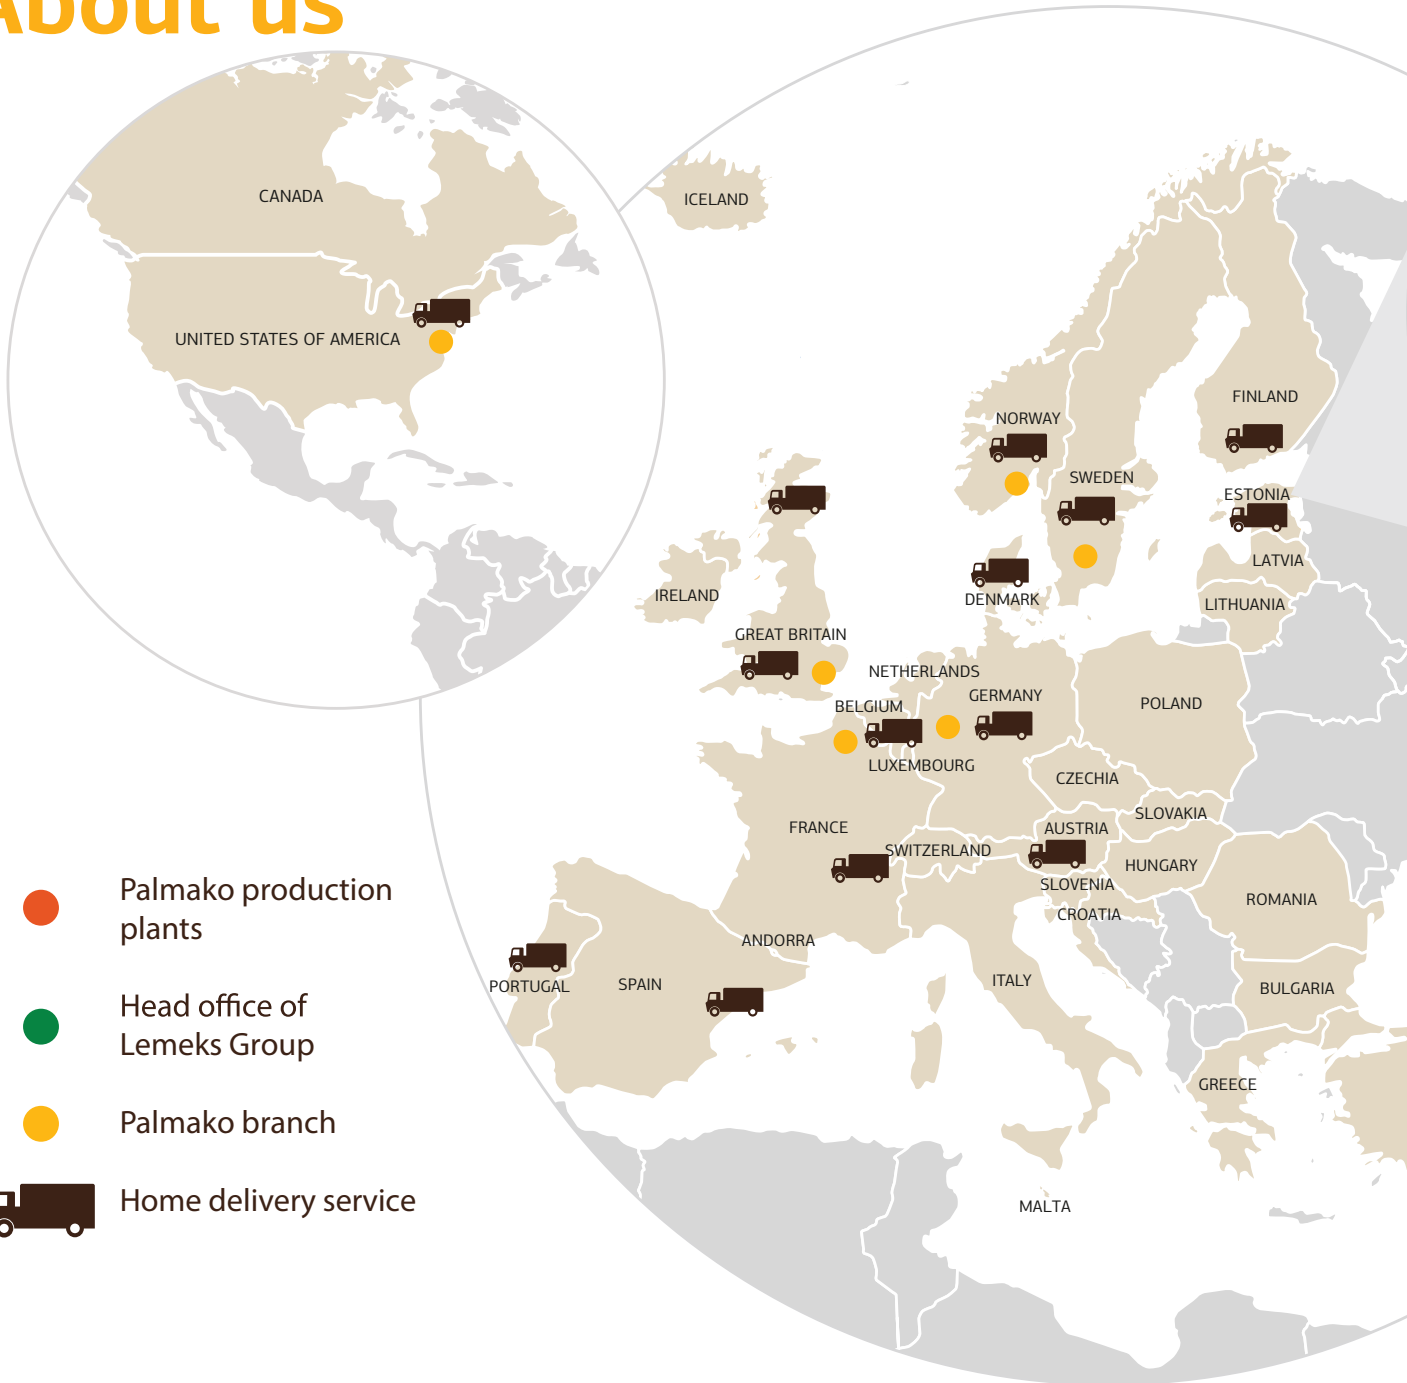

More about the Lemeks Group on the website

www.lemeks.ee

LEMEXS GROUP

About us

- Palmako production plants
- Head office of Lemeks Group
- Palmako branch
- Home delivery service

Principles that we follow in our everyday work:

- We are honest
- We are goal-oriented
- We are open to changes
- We are willing to take responsibility
- We respect our partners
- We assess our colleagues by their results, not by their words
- We share our knowledge and skills with each other
- We aim to do, rather than impress

We have invested over 50 million euros in modern, professional technology, which has enabled us to use the best machinery to make our products.

Leading manufacturer in Europe

Palmako produces and exports over 60,000 wooden houses per year, and 27 years of active operation have given us significant experience to become Northern Europe's leading manufacturer and distributor of square log garden houses.

Scan this QR-code to see a video how our products are made with utmost care!

Social responsibility

Although wood is a sustainable and regenerative natural resource, forestry requires careful and responsible management. An uncaring and irresponsible attitude towards forestry management will inevitably harm our environment significantly. We all have heard stories about the loss of some rainforests, but this concern applies equally to our Nordic forests as well. Palmako is FSC® certified, ensuring that we use wood from responsibly managed forests. We care about the environment, which we share and in which we all live. We really do.

5-year warranty

Over the last 27 years we have produced over half a million wooden houses. We use only the latest technology to make no compromises on quality, and to make sure that the nature and its resources are handled in the best possible way. We really care about the environment that we all share. We hope that already offers a reason to trust us, but we also place a 5-year warranty on our buildings if they are treated according to recommendations. Playgrounds and swings have 2-year warranty for your complete peace of mind.

Excellent customer service

We keep stock of our re-sellers to ensure fast, precise deliveries throughout Europe, and we are ready to deliver our products directly to the end customer's if required. As a multilingual company, we can service our customers in 8 different languages – English, German, French, Spanish, Finnish, Swedish and Norwegian as well as Estonian.

Nordic spruce

Wood is an impressive, warm and living material. And nothing compares to the wonderful aroma of fresh timber. During the long, cold winters the trees grow slowly, which makes their timber especially thick and durable. You can feel it in all our products - comfortable garden and log houses, pavilions, carports, tool sheds, children's play houses, weekend and living houses, glue-laminated products, and wood pellets.

In addition to log cabins, Palmako manufactures wide selection of garden products, glulam products and heating pellets.

Estonia is regarded as the biggest wooden house exporter in the Europe. Palmako plays a significant part in this. Our products are found in more than 30 countries around the world.

Look for FSC® certified products.

2025 Catalogue User Guide

Parts of the catalogue

Introductory pages, where you can find information about us, **p. 1-11**

Products, divided into classes according to their **function**, **p. 16-343**

Information about how to navigate products' pages, **p. 12-15**

Optional products, list of all those that Palmako offers, **p. 344-368**

Special pages:

p. 140-141	Nordic houses introduction and information on assembly	p. 198-199	Palmako Connect introduction
p. 146	Nordic+ houses introduction	p. 268	Nordic+ garages introduction
p. 174-175	introduction to barrel and oval saunas	p. 320-321	introduction to fence series
		p. 364-367	overview of painting the cabins

Structure of products' pages

FUNCTION

All our products are organised into separate classes according to their function and each class begins with an overview of all the items that it includes.

Cabins:
outbuilding and leisure

Pavilions:
Outdoor leisure

Fences:
Fence panels

TYOLOGY

Products of the same type and purpose carry the same name.

In each class products have been assembled into smaller families according to their design.

Families are made up of products that carry similar external characteristics, like type of roof, door and window type and placement, terrace and overhang of the front roof.

Gable roof

Flat roof

Pent roof

Helena cabin family

Irene cabin family

Lotta cabin family

SIZE

Under each family the products are presented in the order of ascending surface area with increasing wall thickness and in some cases improvement of the quality of doors and windows.

15,1 m²
Palmako cabin
Helena

18,6 m²
Palmako cabin
Helena

24,6 m²

Helena

How to read product information

Name of the product

We have put a lot of thought into naming our products and as a result, the name of the chosen product reflects its function, family and size (also additional area when a terrace or side roof is included).

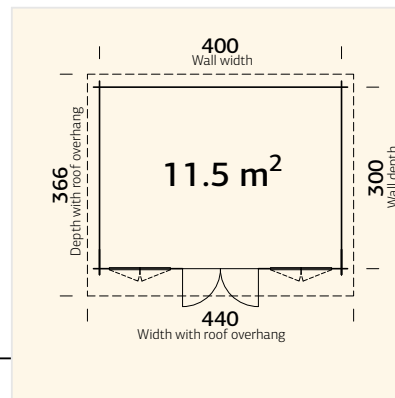

BRAND - **Palmako** > FUNCTION - **cabin** > FAMILY - **Lisa** > SIZE - **surface area 11,5 m²**

Product information

Each page contains one or two of our products with all the information about it listed as symbols or as text. This example below will help you read and understand product information better.

General information described with symbols

OPTIONAL

Roofing felt (underlayer): 3 rolls, SBS roofing material: 3 rolls, roofing nails, EPDM, rain gutters, extension, canopy roof, additional door and window.

Description of the symbols

							Floor boards
							Wood profile
							Age/Weight limit

Wall/element/post thickness

Heights (A - wall height; B - total height)

Optional products

At the end of each product class we have presented a table showing additional opportunities to personalise and style your chosen product, like canopy roof, extension, different roof covering materials, rain gutters, additional doors and

windows and their types, etc. A more detailed list with pictures can be found at the end of the catalogue, under the Palmako Optional Products category.

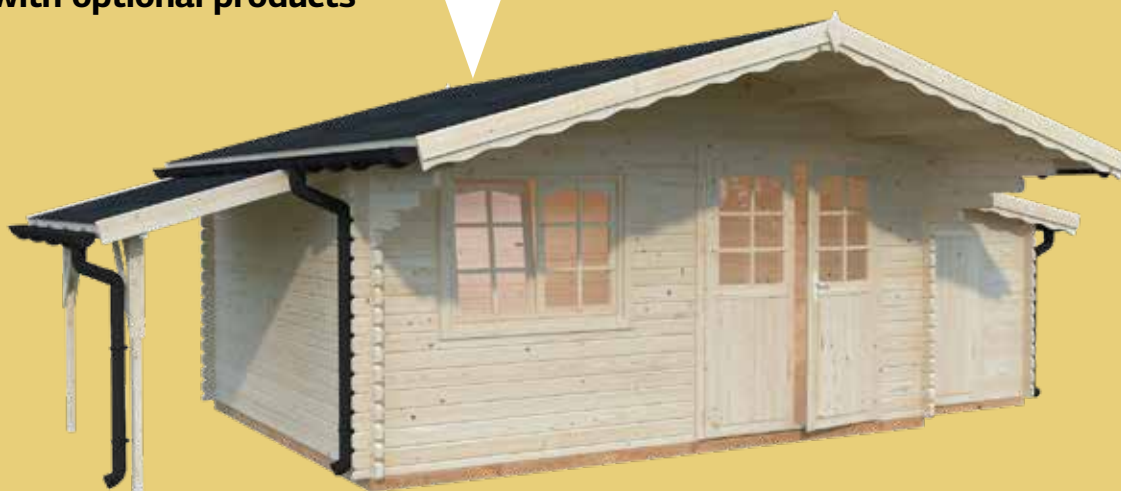

Sally 15,5 m² basic model

BEFORE

Sally 15,5 m² with optional products

AFTER

Toby Set

A wooden playhouse with a black roof, a red slide, and two swings is situated in a lush green forest. The playhouse has a balcony with a railing and a ladder leading up to it. A pink toy car is parked on the ground in the foreground. The scene is set on a bed of wood chips, with a large tree trunk on the left and a large rock in the foreground.

WE PRODUCE COTTAGES OF YOUR DREAMS

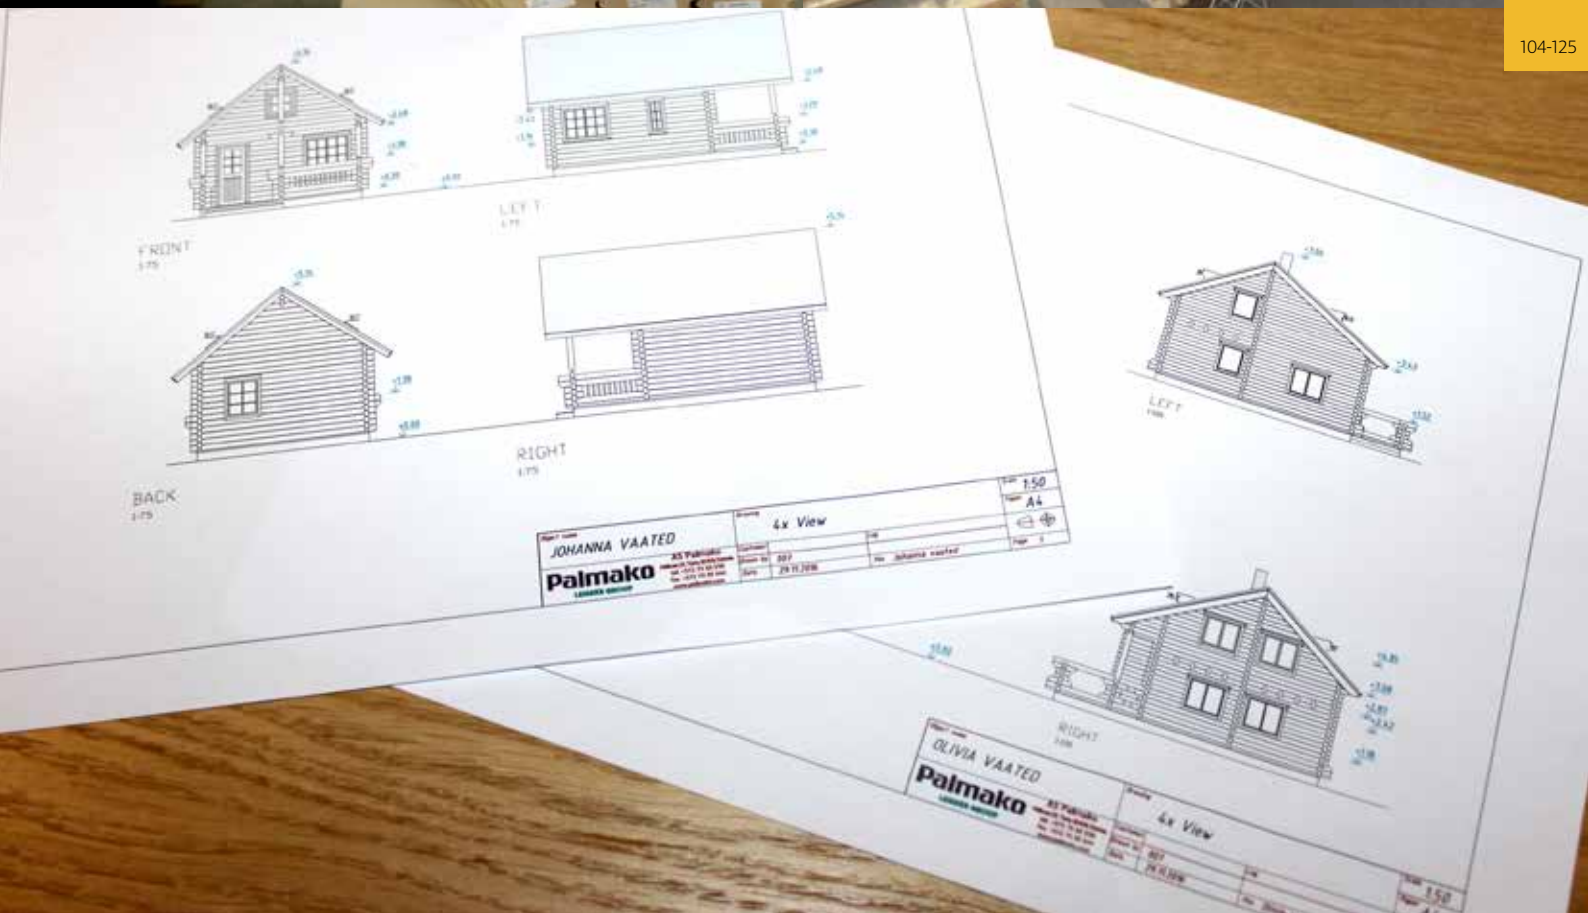

We offer houses with wall thicknesses of 44 mm and 70 mm solid timber, as well as 88 mm, 114 mm and 134 mm laminated timber.

This catalogue includes only some of the models and ideas available for weekend houses – with the help of our architects and bespoke design service we are also able to offer buildings made to your own specific design and requirements.

The 4-side views and ground plans will be supplied when necessary for acquiring a building permit. We can offer you the complete set of wooden details needed for the construction of the house like doors-windows, stairs, cladding for the walls etc. With every house we supply detailed specifications and blueprints for installing the house. All parts have been marked to simplify construction. Please ask for further details.

Individual modifications for all these cottage models in this catalogue are possible! We can also offer these houses with premium quality doors and windows (starting from 70 mm log thickness).

We hope you will take contact with us if you have a dream cottage vision in your head. Together we will definitely find the best solution bringing it to reality.

LOOK HOUSES

126-137

GRACE FAMILY BY PALMAKO

Grace 8,1+4,1 m²

Palmako's new Modern Look Grace family houses are born from constant unrest to create something new and exciting.

These cabins are extraordinary due to the innovative solution for wall construction – special profile of glue laminated timber wall panels. Glue laminated timber is stable and durable base material, that is also wonderfully easy to set up.

The creation of such products is possible, since Palmako's investment into the new fully automatic production line of laminated timber.

Glue laminated wood ensures, that the building does not sink after completing. Unlike conventional laminated timber houses, new wall panel profile is unique - it is thin and high and the tenon joints stay tighter by being covered with a slat.

To reach the full height of the house, only 4 panels on top of each other are needed. When the lifting height of an ordinary milling beam is 114 mm, the new wall panel has a lifting height of 518 mm, which means that the surface of the wall remains smoother. Laminated timber is stable (no expansion-contraction or distortion), has a beautiful structure (no fissures

or defects) and has a good fire resistance and heat insulation.

New innovative garden house family has seven modern cabins. The first four, Grace 8,1+4,1 m², Grace 8,1+8,1 m², Grace 12,4+4,1 m² and Grace 14,5 m², differ only in size and purpose. Why not create a cozy home office in a small cabin with a shorter canopy roof or use the Grace with a longer canopy roof as a sauna or pool house. Grace 12.4+4.1 m² with two rooms is perfect for accommodate friends or relatives. The largest Grace can probably obtain the most functions.

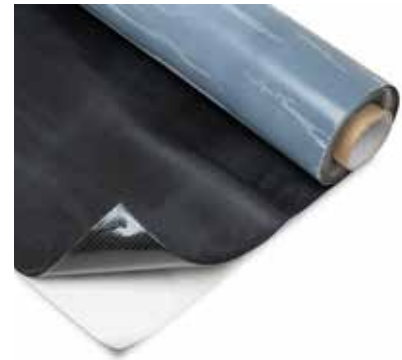

The next three cabins, Grace 11,2 m² Slide Plus, Grace 11,2+8,2 m² Slide Plus and Grace 14,1 m² Slide Plus, take the Modern Look category to the next level. These house models have sliding doors with double toughened 4-16-4 mm glass. The large glass surfaces let more light into the house and allow a great view from inside out. The dark grey colour RAL7016 of the sliding doors frame suits well with any treatment. Please read more about the sliding doors on pages 360-361.

All Modern Look garden houses use innovative glue laminated wall panels. Lifting height of 518 mm makes an installation of the house easy and fast.

Modern wall corner connection of glue laminated wall panels is fixed with dowels and secured by screws.

Stable and weatherproof corner and log connections are guaranteed by using self-adhesive sealing.

Premium quality windows and door

The quality of Grace houses doors and windows is the best in its class. Laminated timber door frames, high quality classy oak-aluminium combined door sill, double toughened glass and premium lock system. Windows are with one-hand tilt-and-turn system with double toughened glass.

Foundation joists and floor boards

Foundation joists of the Grace houses are treated to guarantee long lifetime to the basis of the house. Solid 28 mm floor boards and floor slats are included in the house kit.

Roof construction

Strong glue laminated rafters carry 19 mm roof boards. To ensure water resistance of roof, we strongly recommend to use solid EPDM roof covering for these pent roof house models.

Paint finishing options

The doors/windows can be delivered from the factory with paint finishing, and the colour shade can be chosen from RAL colour chart. The most popular colour tones are:

RAL 1001

RAL 3009

RAL 6006

RAL 7016

RAL 9005

RAL 9010

NB! Colours as shown in the catalogue may vary from the actual colours.

WE HAVE A GREAT ALTERNATIVE TO THE TRADITIONAL GARDEN HOUSE!

These contemporary-style buildings with a Scandinavian look and quality are most suitable for a city garden. Palmako Nordic Houses represent our most modern and innovative pre-fabricated house models.

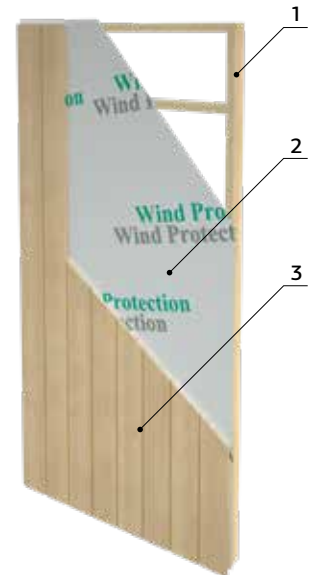

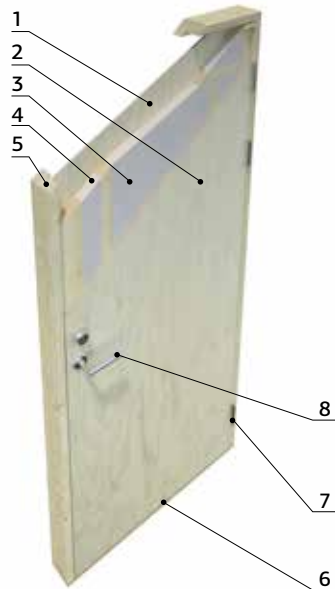

Ready-made wall elements are covered with wind-protection plastic inside, making these houses extremely weatherproof, especially rain and wind resistant. 70 mm frame construction is perfect for hiding cabling (wires, pipes, etc) as well as for the same thickness of insulation. All the houses have double thermo glazing and outwards-opening windows.

These models have 40 mm EPS (Expanded polystyrene) insulated doors, which makes them especially rain and wind resistant.

Total element thickness by Nordic houses is 88 mm. Here is a cross section of an element just to get better understanding of what these elements look like and consist of:

1. Plywood 10mm
2. Plywood 10mm
3. EPS 50 40mm insulation
4. Wooden skeleton 40x40mm
5. Wooden laminated frame 44x105mm
6. Hardwood 28x93mm threshold
7. Hinge 115x84x3mm (3x)
8. 565 lock and lock box

1. 34x70mm frame
2. Wind-protection plastic
3. 18mm fine sawn cladding

PRE-FABRICATED PALMAKO NORDIC+ HOUSES WITH ELEMENT THICKNESS OF 160 MM

These Scandinavian-style houses are suitable for any garden that lacks strong, weather-resistant buildings where you can be with your family and friends. Feel free to take your time and delve into the following pages of our best choice of modern, pre-fabricated Nordic+ houses.

Ready-made wall elements are covered with wind-protection plastic inside, making these houses extremely weatherproof, especially rain and wind-resistant. It is comfortable to be in a building when it is warm - we have thought about it and given you an opportunity for 95 mm insulation. You can insulate walls, floors and ceilings. For better house ventilation we have added ventilation battens under the cladding. All the houses have double thermo glazing and outwards-opening windows. These models have 40 mm EPS (expanded polystyrene) insulated doors.

Total element thickness of Nordic+ houses is 160 mm. Here is a cross section of an element just to get a better understanding of what these elements look like and consist of:

1. 44x95mm frame
2. Wind-protection plastic
3. 19x45mm ventilation battens
4. 28x70mm cladding support battens
5. 18mm fine sawn cladding

One set – many houses!

A model contains set of wall and window-door elements, which can be rearranged in several ways. This results in multiple appearance options for the house.

Anette 3,0+1,5 m²

GARDEN SPA

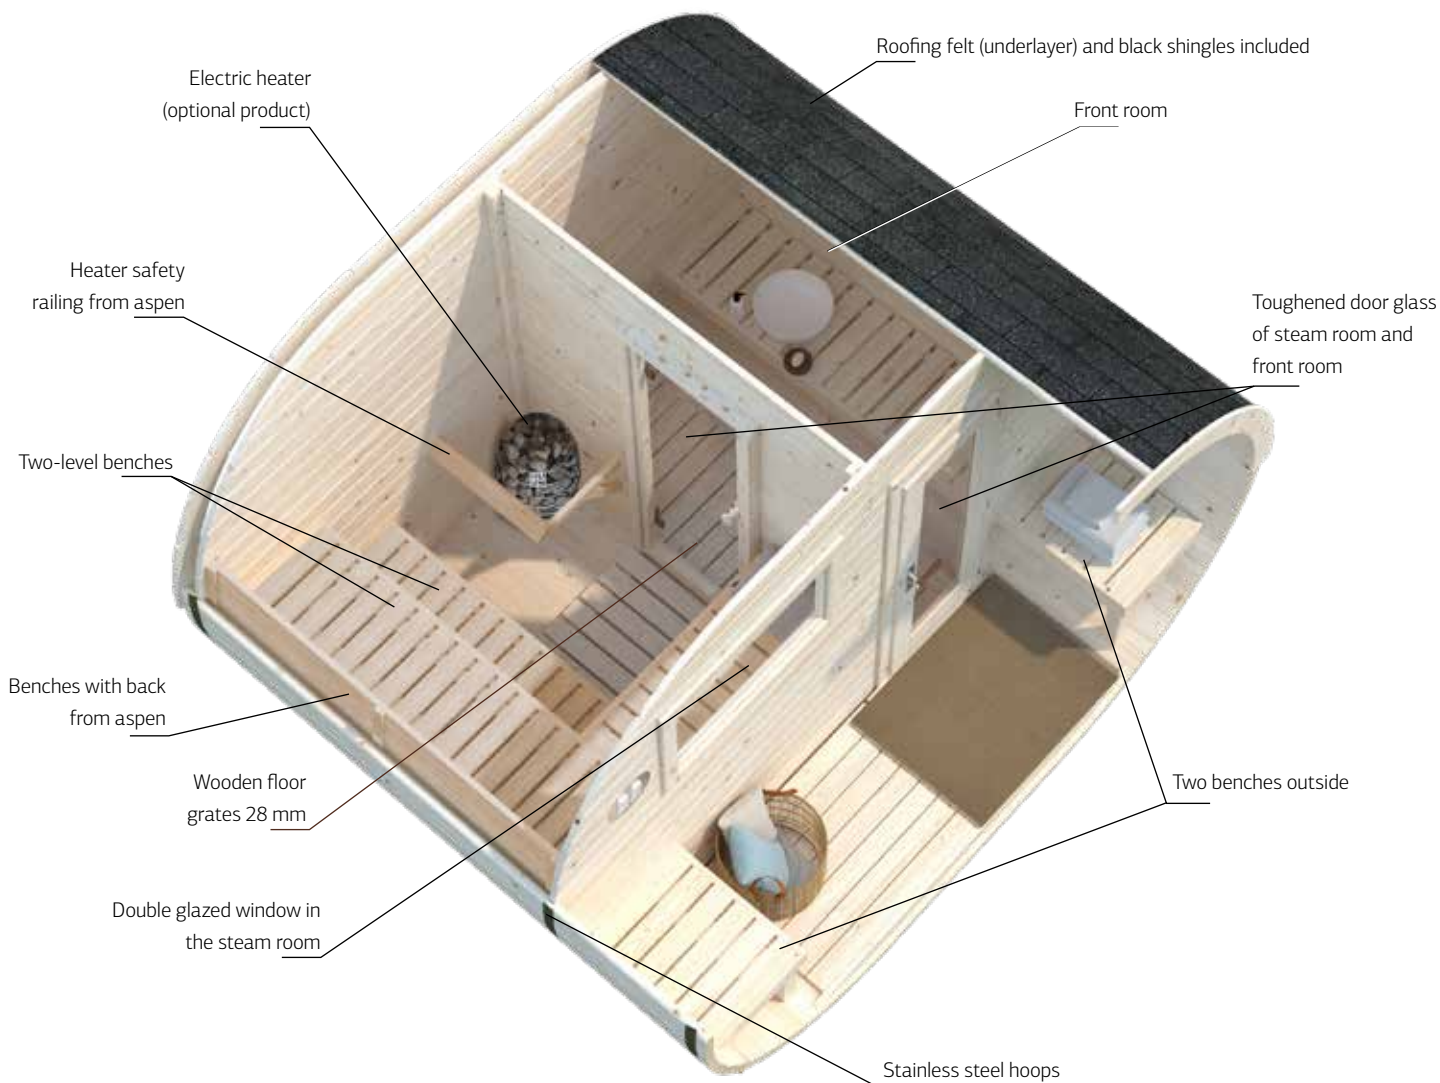

OUTDOOR SPA IN YOUR OWN GARDEN

We are delighted to introduce you our brand new Garden Spa category - a generation of Spa products, which brings a new level of innovation to our range. What could be more enjoyable than having an outdoor spa in your own garden, a relaxing area and a healthy extra space for yourself, your family and friends. With having a sauna in the garden you can easily transform your garden or property into a personal functional garden SPA.

We have in Garden Spa product range many saunas – let us introduce you the barrel saunas called Anita and an oval sauna Anette 3,0+1,5 m². There are five Anita barrel sauna models. The first, Anita 0,9 m²., is the smallest one, a very compact and little space requiring sauna. The larger Anitas are available with a wooden front wall and a glass front wall, accordingly Anita 1,3+0,7 m², Anita 1,3+0,7 m² with glass wall, Anita 1,6+0,7 m² and Anita 1,6+0,7 m² with glass wall.

Electric heater can be ordered as an optional extra – there are HUUM Drop and Narvi NM heaters in our selection. Please see the pages 193-194 for more information.

Please get familiar with the 3D cross-section showing the main features of an oval sauna Anette 3,0+1,5 m².

The shape of barrel and oval saunas provide a **good air circulation**, the heat distribution is very even because after hot air rises in the steam room it gently curls down each side of the sauna. Cool air is pulled in the low vent by the vacuum created by hot air rising, which then exhausts out the high vent on the opposite side of the room.

Steam room **benches with backrest** take the pressure off from low back, shoulders and neck and help to ensure the spine in a neutral position. These benches are made of **aspen** which has low thermal conductivity and does not release resin.

The **two-level benches** (in Anita 0,9 m² and Anette 3,0+1,5 m²) allow each person to choose the optimal temperature regime.

Removable **28 mm wooden floor grates** can be easily cleaned, won't let you to slip and feel really good under your bare feet.

Front room (in Anette 3,0+1,5 m²) can be used for many different purposes – you can either wash yourself, store your belongings, change clothes, take a short break or sometimes just hide from bad weather.

Black shingles are included in the set. Shingles protect your sauna from the top and give the final touch in appearance. Anette 3,0+1,5 m² set includes additionally also the roofing felt (underlayer).

Both saunas have **high quality doors and window**. The glass door of the steam room has an 8 mm toughened glass, while the partly glazed outside door has a 4-6-4 mm double toughened glass. The window has a 3-6-3 mm double glass.

Window in the steam room (in Anette 3,0+1,5 m²) lets natural light inside and gives a chance to look outside while enjoying sauna procedures. Anita 1,3+0,7 m² glass wall and Anita 1,6+0,7 m² glass wall models have a glass front wall with 6 mm toughened glass, which lets you enjoy the nice view to your garden.

The cozy outdoor benches offer a nice place to take a short break, breathe fresh air or enjoy some refreshments.

PALMAKO LOG SAUNAS

Garden Spa product range includes different looking saunas, everyone should find a sauna they are looking for. In addition to the barrel and oval saunas one can relax and enjoy the sauna rituals also in our log saunas called Sanna.

Sanna steam room ceilings are provided with the 30 mm **insulation** and covered with the 16 mm **wooden cladding**.

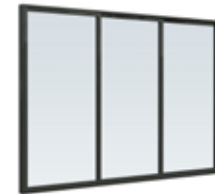

Steam room benches are made of **aspen** which has low thermal conductivity and does not release resin. The **two-level benches** allow each person to choose the optimal temperature regime.

The **cozy outdoor bench** outside offers a nice place to cool down after the session in steam room and take a short break while the **Louvre panel** provides privacy.

Sanna saunas have **high quality doors and windows**. The glass door of the steam room has an 8 mm toughened glass, while the partly glazed outside door has a 4-9-4 mm double toughened glass. All windows have a 4-9-4 double toughened glass. Most of Sanna saunas have **window in the steam room and front room**, which allows natural light in and lets enjoy the view outside.

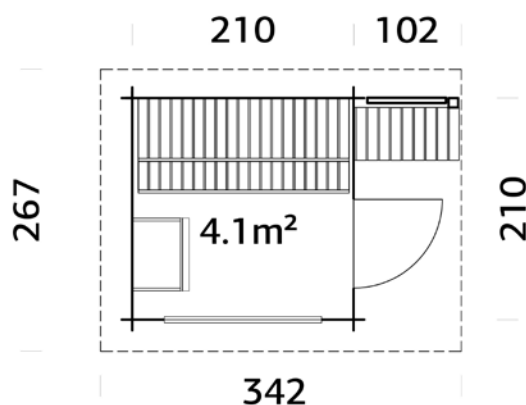

The frame colour of Sanna 12,8 m² **sliding doors** is dark grey RAL7016. Sliding door Slide has 4 mm toughened glass, sliding door Slide Plus 4-16-4 mm double toughened glass.

A HEATER IS THE HEART OF YOUR SAUNA

A heater is like the heart of a sauna, without the heater there will be undoubtedly no joy of being in a sauna. Although both wood-burning and electric heaters have their advantages and drawbacks, eventually, the choice of the heater is a matter of personal preference. Our saunas are developed for heating with electric heaters, which we offer as optional products. Electric heaters heat up the sauna fast, allow the users to have control over the temperature and change it easily. Please keep in mind to use a licensed electrician to complete the installation of an electric heater.

There are two heaters in our selection – HUUM Drop and Narvi NM, both 6 kW. Please get familiar with the descriptions and specifications so you can make the right decision when choosing the one for your sauna. For further information please contact the salesteam.

Narvi NM electrical heater 6 kW

Black painted, stainless steel

2-year warranty

Measurements: 580 x 430 x 300 mm (height x width x depth)

Safety distance: sides 50 mm, front 80 mm, top 1150 mm, floor 120 mm

The set includes

- electric sauna heater
- heater stones (two boxes, 40 kg)
- installation brackets and connection wiring (different wires inside the heater)

The wire from heater to plug is not included in the set. The heater has the readiness for this cable – the holes in the heater where to put the wire ends from the plug.

Power

Fuse	3 x 10 A
Supply voltage 3-phase	400 V 3N
Cable	5 x 1,5 (N x mm ²)

In the case of a 230 1N connection, an analogous connection is made to the 3-phase. The heating circuits must be done before the circuit breaker.

All of the electrical connections must be done by a certified professional.

HUUM Drop electrical heater 6 kW

Stainless steel

5-year warranty

Measurements: 590 x 390 x 335 mm (height x width x depth)

Safety distance: sides and front 120 mm

The set includes

- electric sauna heater
- heater stones (four boxes, 60 kg)
- built-in electronic control (UKU Local controller)
- wall mount
- 5+5 m cable for temperature and door sensor
- 3 m cable for main module and user interface
- Screws for fastening the user interface and temperature sensor

Power

Fuse	3 x 10 A
Supply voltage 3-phase	400 V 3N
Cable	5 x 1,5 (N x mm ²)

In the case of a 230 1N connection, an analogous connection is made to the 3-phase. The heating circuits must be done before the circuit breaker.

All of the electrical connections must be done by a certified professional.

UKU Local controller

Temperatures: 40-110°C

Supply voltage: 400 V 3N; 230 V 1N

Heating period: 3h, 8h, 12h

Connectable to lights/ventilation and steamer

Temperature sensor and overheating protection

Door sensor

Child safety lock

Timer

The set includes

Control console (105 x 55 x 22 mm)

Control console cable (3 m; 4 x 0,34 mm²)

Main module (142 x 90 x 58 mm)

Temperature sensor

Door sensor

Temperature/door sensor cable (5 + 5m; 2 x 0,22 mm²)

Bianca 16,6 m² Set 108

CONNECT

PALMAKO CONNECT – SPACIOUS BIANCA AND LENNA PAVILIONS

Palmako Connect product series is a brand new concept of different looking spacious pavilion sets. All these sets are an outcome of combining different Palmako Connect components. If you have a specific vision in your head how the building should look like, all Palmako Connect components can be combined with each other to create your dream. In case you do not know which building you wish for and want to see which sets there are in our range to choose from, please get an overview of our sets starting from pages 204 and 230.

Palmako Connect product sets are with a pyramid gable and a pent roof, we call them accordingly **Bianca** and **Lenna**. All the sets are available in both roof types.

Palmako Connect Bianca 24,9 m² Set 211 Slide

Palmako Connect Lenna 24,9 m² Set 411 Slide

Complete your Bianca or Lenna set with our optional products

Bianca 16,6 m² Set 205 basic model

BEFORE

Rain gutters

Shingles

Roofing nails

Floor (outdoor)

Floor (indoor)

Bianca 16,6 m² Set 205 with optional products

AFTER

natural, untreated wood

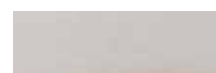

brown dip

grey dip

clear white dip

white + white
(RAL9016 + RAL9016)

The overview of Palmako Connect pages

Palmako Connect product series has got a lot of main products, components and product sets, for better understanding of this section let us introduce you the structure of these pages.

Palmako Connect introduction

p. 198-199

A summary of our exciting new product concept which has so many opportunities and possibilities to enrich your garden and improve the quality of your life.

Overview of main products and components

p. 200-203

Product information and visuals of Bianca and Lenna roofs with the internal area of 8,3 m², 16,6 m² and 24,9 m², and components that can be fit and combined with each other (Bianca and Lenna extra roof, full wall, Louvre wall, wall with hatch, half-wall corner, fence, apex, sliding doors, floors).

Bianca Sets

p. 204-229

Gable roof pavilions, many different looking sets to choose from, starting from airy pergolas and finishing up with the functional large buildings with sliding doors.

Lenna Sets

p. 230-255

Pent roof pavilions, lots of designs created in the interest of your garden to find the building that suits you best. Take a look at the smaller pavilions or surprise yourself with our bright and large cabins with elegant sliding doors.

PRE-FABRICATED PALMAKO NORDIC+ GARAGES WITH ELEMENT THICKNESS OF 160 MM

These Scandinavian-style garages are suitable for any garden that lacks strong, weather-resistant buildings where to park your car. Feel free to take your time and delve into the following pages of our best choice of modern, pre-fabricated Nordic+ garages.

Ready-made wall elements are covered with wind-protection plastic inside, making these garages extremely weatherproof, especially rain and wind-resistant. It is comfortable to be in a building when it is warm - we have thought about it and given you an opportunity for 95 mm insulation. You can insulate walls, floors and ceilings. For better ventilation we have added ventilation battens after cladding. All the garages have double thermo glazing and outwards-opening windows. These models have 40 mm EPS (expanded polystyrene) insulated doors.

Total element thickness by Nordic+ garages is 160 mm. Here is a cross section of an element just to get a better understanding of what these elements look like and consist of:

1. 44x95mm frame
2. Wind-protection plastic
3. 19x45mm ventilation battens
4. 28x70mm cladding support battens
5. 18mm fine sawn cladding

One set – many houses!

A model contains set of wall and window-door elements, which can be rearranged in several ways. This results in multiple appearance options for the house.

THE DOOR QUALITY OF MARTIN, OLAF AND KALLE SHEDS

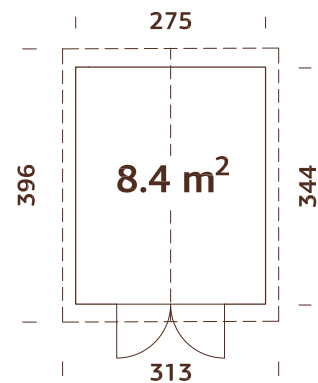

Contemporary-style buildings including Martin, Olaf and Kalle sheds have ready-made wall elements that are covered inside with wind and moisture protection plastic, making these houses extremely weatherproof. A model contains a set of wall and window-door elements which can be rearranged in several ways. Simple construction allows for fast and easy assembly.

These models also have 32 mm EPS (expanded polystyrene) insulated doors, which make them especially rain and wind resistant. Please study the drawing.

1. HDF 3mm
2. EPS 50 32mm insulation
3. Wooden cladding 12x114mm
4. Wooden skeleton 32x40mm
5. Wooden laminated frame 44x90mm
6. Hardwood 28x78mm threshold
7. Metal kick plate 0,5mm covered with black pural matt coating
8. Hinge 115x84x3mm (3x)
9. 2018 lock and lock box

CREATE YOUR OWN GARDEN STORY WITH PALMAKO FENCE PANELS

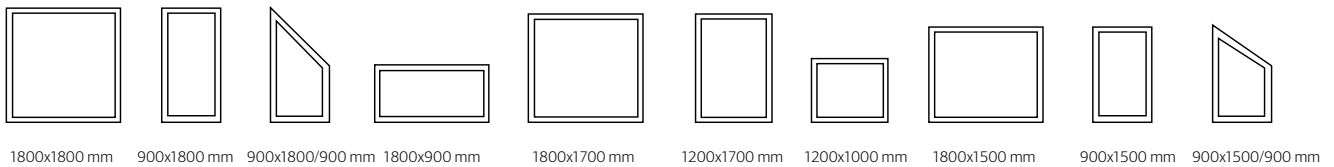

If your garden misses elegant and airy fence panels, be ready to meet our Fence panels selection. Surrounding your city garden or terrace with fence panels is so easy and a refreshing way to give your favourite place to be a unique and modern look.

We have nine different designs within our fence panel collection so you can pick your favourite or why not combine different designs according to your needs. All our fence panels have 33x57 mm or 32x40 mm frame which makes them easily manageable and show that your garden has been nicely taken care of.

Please get familiar with designs as follows:

	Line Horizontal with gaps.		Marit Horizontal with gaps and two vertical rails. Vertical trellis with three crosses.
	Nina Horizontal with gaps.		Karina Vertical with rail in the middle. Vertical trellis with three crosses.
	Reena Vertical with rail in the middle. Horizontal trellis.		Janet Vertical boards with 6 mm bright toughened glass.
	Elke Vertical with rail in the middle. Vertical trellis.		Birgit 6 mm bright toughened glass in a solid wood frame.
	Helis Horizontal with gaps and two vertical rails. Vertical trellis with one cross.		

Depending on model, one can choose between ten dimensions:

And depending on model one can choose between different treatments which suits the best into the garden interior:

grey pressure-treated

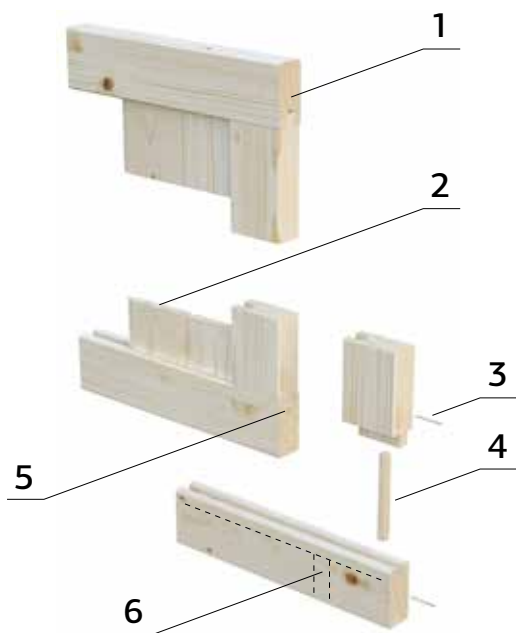

green pressure-treated

primer+white painted 2 layers (RAL 9016)

primer+grey painted 2 layers (RAL7016)

1. Frame profile 33x57 mm
2. Board profile 12x95 mm
3. Brad nails
4. Dowel 10x130 mm
5. Water channel
6. Drainage hole to let out any built up moisture or water

All our fence panels can be easily assembled. If you look at the visual of assembling a fence panel below, you will see which products you need and how to assemble them together.

See Optional Products on p. 355 for details.

1. Fence panel
2. Post
3. Post leg
4. Screws
5. L-type fastening brackets
6. Post cap

Fixings to the ground should be done properly according to the foundation. Please get appropriate fixing items from the DIY-store.

Scan this QR-code to see the assembly of Palmako Fence Panels!

All fence panels are made of Nordic spruce which is dense, strong, durable and has small knots.

Depending on the model of the garage, additional accessories may be required for installation.

Electrical connection required!

ROOFING MATERIAL

To keep your house well protected from the weather, we offer you different types of roof covering materials - roofing felt (suitable as an underlayer), SBS roofing material, shingles or EPDM. The second one, SBS roofing material can be attached in a single layer, but it would be temporary solution and will not last as long as attached in multiple layers. It can be welded on the preplaced bottom layer of roof cladding with a gas burner. Attention! For wooden houses please follow the safety requirements, and if possible please let it be welded by professional roofers. The last, EPDM, is perfect for flat-roof models. We offer shingles in four different colours as follows - black, red, green or brown. You can buy roof covering material in full rolls/packs/ready-cut pieces.

	Article number
Roofing felt, black, 1 roll = 10 m	107210
SBS roofing material black, 1 roll = 10 m	107214
Shingles, black, 1 pack = 3 m ²	107180
Shingles, red, 1 pack = 3 m ²	107182
Shingles, green, 1 pack = 3 m ²	107183
Shingles, brown, 1 pack = 3 m ²	107181
EPDM, black, 1 roll = 1,5x10 m	111847

ROOF COVERING MATERIAL FOR FLAT ROOF HOUSES

Palmako offers a wide range of flat roof cabins. A question that we have always been asked is what to use as waterproof roof covering material for flat roofs? As you notice in the section of „Optional“ under each flat roof house there is a mention of special rubber roof covering material – EPDM (ethylene propylene diene monomer).

We offer **self-adhesive EPDM** with one fully adhesive side. One roll is 1,5 m wide and 10 m long. The article number and number of rolls suitable for the specific house is given in the table of optional products after every product group and in the Optional Products part at the end of the catalogue.

The outer layer is made of vulcanized EPDM rubber in black colour, suitable for exposure to weather, with 400% elasticity and high impact resistance. The inner layer is fully adhesive due to the addition of a water-based dispersion adhesive, free of solvents and VOCs. This layer is protected by a white release film.

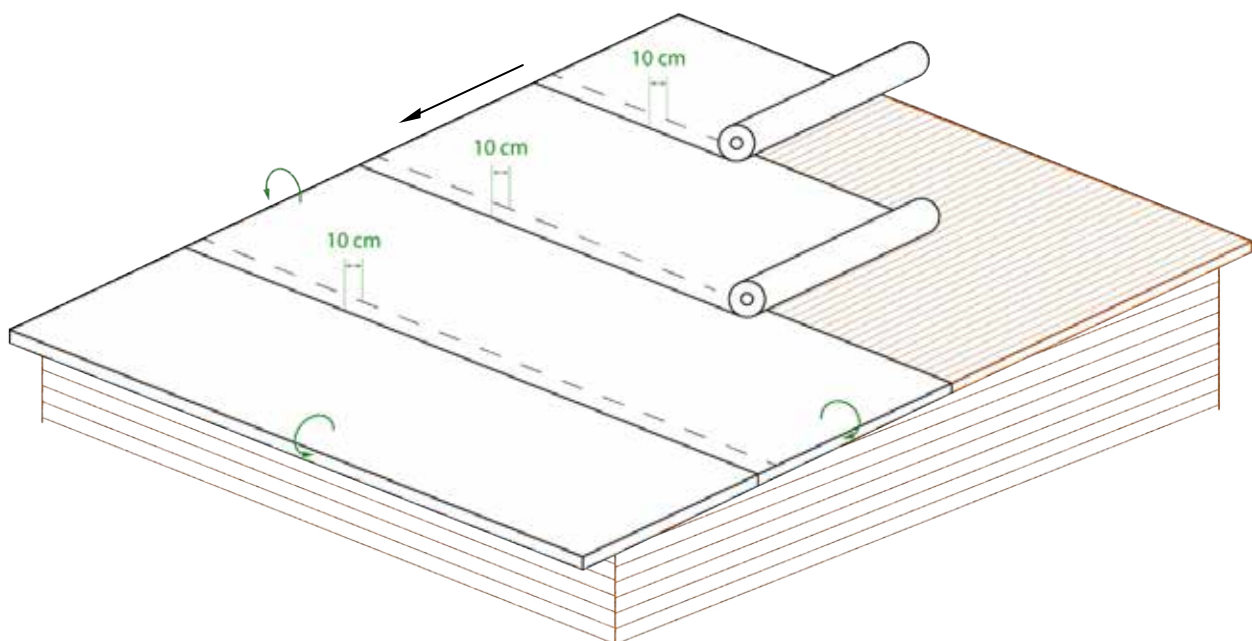

Preparation

- The support must be dry and clean, free of dust.
- There are no sharp elements, such as splinters, nail heads or protruding screws.
- There are no cutting or aggressive edges or joints between boards.

Necessary tools

- White marker
- Scissors (don't use cutter or knives)
- Pressure roller

The installation of EPDM is easy, just follow the installation manual enclosed with the product.

FOUNDATION FRAMES (INCL. LOGFOOT™ BRACKETS)

We offer our garden house customers a Foundation Kit, which includes a cut-to-size foundation frame and adjustable metal feet, known as LogFoot™. The foundation frames are pre-cut to certain fixed sizes. However, to ensure a perfect fit for your specific garden house, some final adjustments are needed to match the frame to the exact dimensions of your cabin.

FLOORS

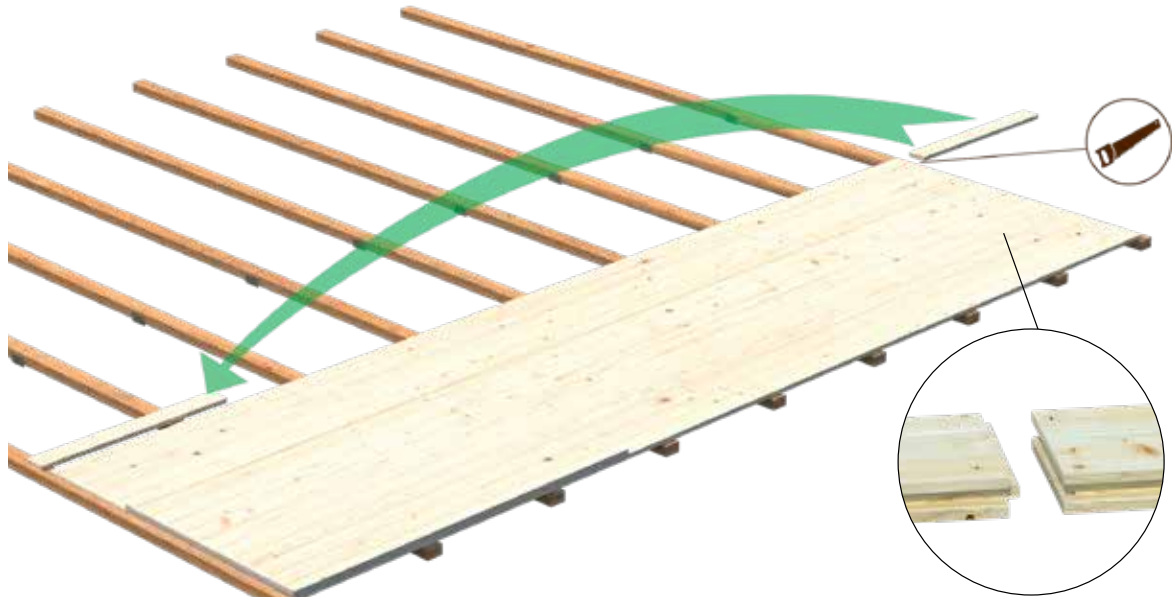

To meet specific market demands some of our cabins are sold without a floor. Although in majority cases floor can be purchased as an optional extra. As of 2021 Palmako starts to offer unified floor kits in such cases.

An unified floor kit contains of:

- 19x89x2350 mm double and tenoned needed number of floorboards
- 45x70x3000 mm brown dipped (BNDIP) needed number of foundation beams
- 19x19x2350 mm skirting boards
- 19x19 mm door strip according to the width of the door opening (in two sizes - for a single door and a double door) and the wall thickness.

Unified floor kits can be brown, grey or white dipped.

Due to the different size of cabins and measurements of the floors, please consider below described principle in general in cutting floorboards into the exact measure.

Double end tenoned floor board

Brown dipped foundation beams, 45x70 mm

ADDITIONAL DOORS AND WINDOWS

Majority of our cabins and buildings are designed in a way, that one can easily amend it with additional door(s) and window(s) in addition to the existing ones. So far Palmako offered a limited range of additional doors and windows. As of 2021 we offer full range of doors and windows suitable to our buildings. For example our cozy and classical cabin Sally 15,5 m² has just one double window in original set. If one wishes a more lightful cabin, it can be easily amended by exactly the same type of additional window (Art. No. 103502). As one building can consist of different sizes and models of doors and windows, please consult with our sales team before placing an order.

- 1 Cabin Sally 15,5 m² with one double window in original set
- 2 Cutting the wall according to the measures of the window
- 3 Cabin Sally 15,5 m² has now two double windows

* Article number is given as natural wood (NO treatment). If the house has treatment options, one also can order additional door(s) and window(s) with the same treatment. Just consult with our sales team or representative.

With standard doors Palmako provides door handle and lock cover kit. Shall one need to change the existing door handle and lock cover kit or just needs one extra, we are more than glad to deliver.

Art. No. 108422

PLYWOOD DOORS

If you have built a garden house, shed or have in your garden some other ancillary building that needs a good and proper door in front of it then please get familiar with doors on this page. We have added to our windows and doors selection single and double doors made of plywood. With or without glass, just as you like the best.

MODEL SPECIFICATIONS

Jamb: pine
 Laminated finger jointed frame
 Red wood plywood 4 mm
 Cladding 12x114 mm

Rubber seals
 Hardwood threshold
 Hinges (3x)

Art. No.

108304
 Cylinder lock, handle and lock cover for plywood doors are an optional extra!

GLAZED SLIDING DOORS

From now on we have many houses with sliding doors in our product range. Sliding doors have many benefits which may encourage you to favor them over the regular doors. They let in more natural light, large glass panels running from the ground up to the top maximizes the natural lighting in the room. Sliding doors are useful if there is a need for ventilating the room without opening any door too wide. They are easy to use when entering and leaving the house. The large glass surfaces of the sliding doors let you enjoy beautiful views to the garden or backyard. And last, but not least, sliding doors look good, they add aesthetics to the building and are valued for functional and practical design. Sliding doors are just beautiful!

Sliding door Slide

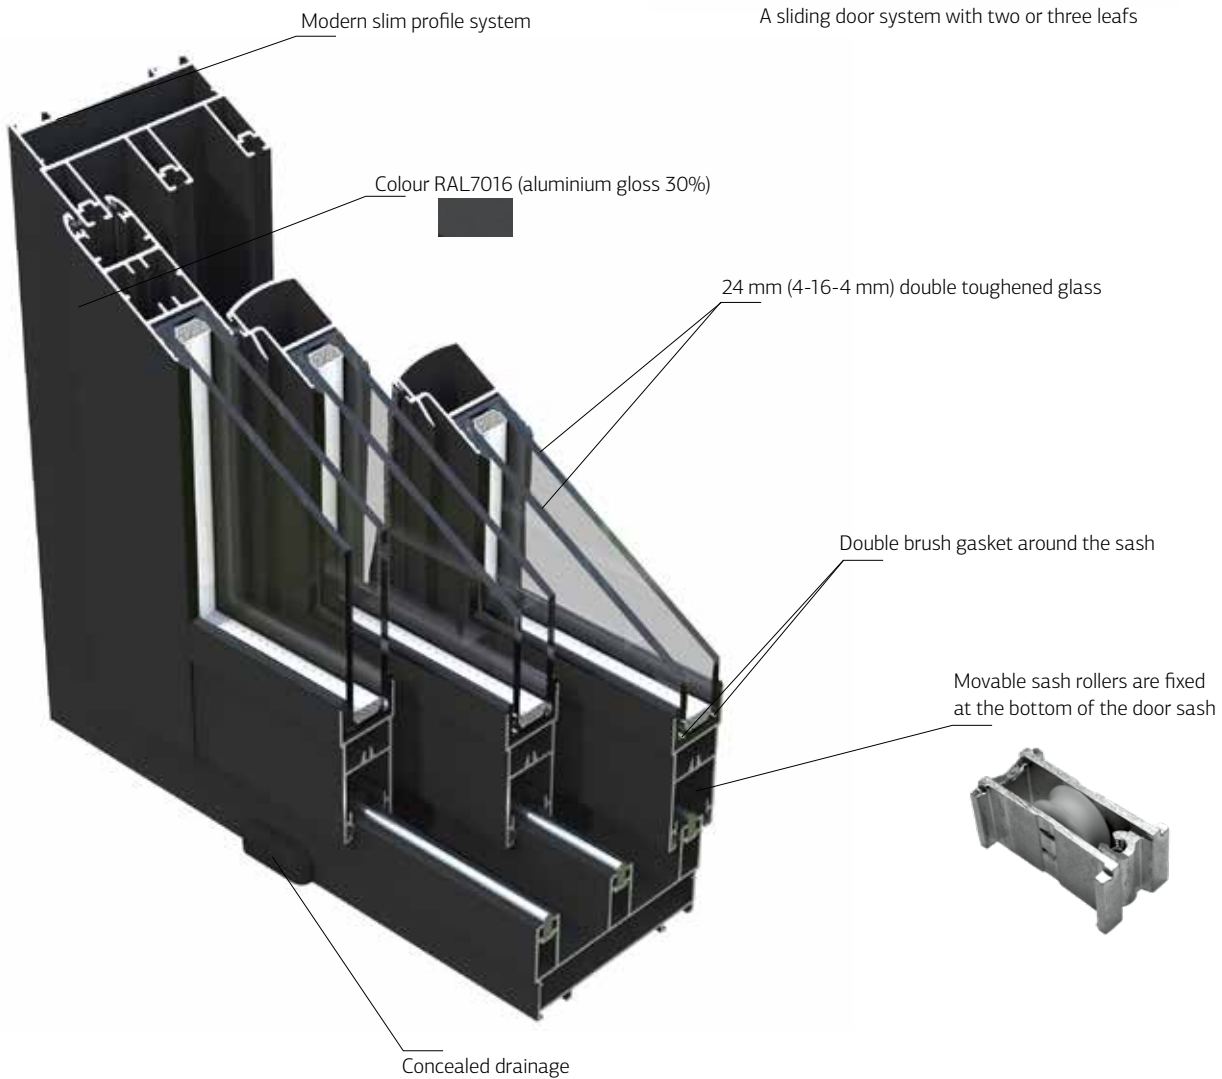

- Without thermal insulation
- Door leaf security plugs

Sliding door Slide Plus

A sliding door system with two or three leaves

- Door leaf security plugs

Surface mounted pull handle with cylinder lock

Treatment as additional protection for wooden products

Production lines and machines allow us to flexibly arrange procedures and to produce a very wide product range from square log houses with different log thicknesses to the element, prefabricated and large weekend log houses. In addition to other wooden products in your garden - fence panels, terrace fences, garden furniture, machine rounded posts, flowerboxes, log rolls and many other products.

Unprocessed wood becomes greyish after having been left untouched for a while and can turn blue and become moldy. Treating wood with a preservative effectively protects against wood-destroying fungi and insects, including termites. Therefore we recommend using our product treatment service. Depending on the product type we are able to treat the products in different ways.

DIPPING

As we have our own treatment baths for brown, grey and clear white dip treatment, cabins and other larger sized items can be ordered treated with Axil 3000 P by the Sarpap & Cecil Industries water-soluble treatment liquid, guaranteeing treatment within classes 1–3. Dipped wood must be finished with at least two layers of topcoat. Topcoat should be applied on the dipped product as soon as possible. In case the dipped cabin is left unfinished for over six months, the wood protective properties of the dipping liquid will start decreasing.

PRESSURE-TREATING

Smaller sized items like furniture can be pressure-treated in the vacuum-pressure-vacuum method giving these items a green or brown shade. Depending on model, fence panels can be grey or green pressure-treated or white or grey painted (primer plus two layers of paint). In order to extend the service life of timber we treat our products with Impralit®-KDS wood preservative. This is a water-borne, chromium-free wood preservative for the prevention of insect attacks, soft rot and fungal decay. It also offers temporary protection against blue stain and mould. Impralit®-KDS is only to be used for treating wood according to the

requirements of use classes 1, 2, 3 and 4 as stipulated in EN 335-1. For wood under cover and in the open, above ground and in ground contact, e.g. poles, fencing, playgrounds, pergolas, etc. The preservative penetrates deep into the wood with the help of vacuum and pressure. In this case a vacuum is initially generated in the cell cavities thereby evacuating the air inside them. The cavities are then filled with a preservative solution that is forced into the wood under high pressure. For vacuum pressure impregnation we work with different processes depending on the type of wood, environment and end purpose.

PAINTING

We have invested into modern painting technology that enables us to paint smaller sized garden products like fence panels and posts. Today we are able to paint the products white or dark grey, using flowcoating method and spray chamber method. After painting, the products will dry in a 30 meter long drying chamber, where the whole process of drying can be adjusted and observed.

WTPNT1+2 primer + white painted 2 layers (RAL 9016)

WTPNT1+2 primer + white painted 2 layers (RAL 9016)

WTPNT1+2 primer + white painted 2 layers (RAL 9016)

GYPNT1+2 primer + grey painted 2 layers (RAL 7016)

PRIMING

Using the same technique, we are now also able to coat several houses with one layer of white primer (WTPNT1+0), which simplifies further finishing of the product.

Painting the cabins - the highest level of protection for your garden house

We have a new possibility for treating our products – depending on the product we can now paint a wide range of cabins in our product range. We value your time, you don't need to think about or paint the product yourself. After assembling the house all you need to do is furnish the building and enjoy it!

Colours

Let us introduce you to our colour tone system. The combination of colours consist of the main colour and accent colour. Not all the cabins can be painted in all colour combinations, depending on a product every cabin has particular colour combinations to choose from.

An overview of all colour combinations – on the left the main colour, on the right the accent colour:

light grey + anthracite
RAL7042 + RAL7016

dark grey + anthracite
RAL7012 + RAL7016

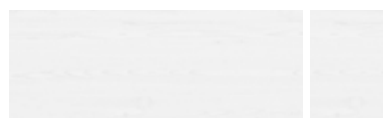

white + anthracite
RAL9016 + RAL7016

light grey + white
RAL7042 + RAL9016

dark grey + white
RAL7012 + RAL9016

white + white
RAL9016 + RAL9016

light grey + light grey
RAL7042 + RAL7042

dark grey + dark grey
RAL7012 + RAL7012

Paint description

We use weatherproof water-based acrylic paint for finishing wood surfaces and details. The paint forms an elastic, water and dirt repellent protective film on the surface.

No reverse installation

A wide range of our houses can be built in reverse. The wall details of painted cabins are painted only from one side, this is the reason why the painted cabin cannot be installed in reverse.

Natural interior

The interior of the cabin stays natural (interior walls, floor boards and roof boards). You have a choice to cover the interior with a colourless wood impregnation agent and enjoy the beauty of natural wood or use paint, glaze or other wood protection.

Pictures are illustrative only

Please note that the visuals of the painted cabins are illustrative only and may differ from the actual finish of the product.

Sales and Warranty Terms and Conditions of painting

Please ask for the sales and warranty terms and conditions of painting from our sales team.

THE DESCRIPTION OF PAINTING THE CABINS

Cabins with modern corner connection

PAINTED

- logs from outside
- doors and windows (painted from outside and inside)
- external slats from all sides

NOT PAINTED

- logs from inside
- floor boards
- roof boards
- rafters, purlins
- all the details seen inside of the house
- foundation beams (brown dipped)

Cabins with chalet-cut logs

PAINTED

- logs from outside
- log ends from outside and inside
- doors and windows (painted from outside and inside)
- external slats from all sides

NOT PAINTED

- logs from inside
- floor boards
- roof boards
- rafters, purlins
- all the details seen inside of the house
- foundation beams (brown dipped)

Canopy roofs

PAINTED

- back wall (painted from both sides)
- external slats from all sides
- posts
- front rafter and back rafter
- Louvre wall

NOT PAINTED

- roof boards
- rafters, purlins in the middle

Post and beam construction, windows and doors

PAINTED

- all the wooden details from all sides

NOT PAINTED

- foundation beams (brown dipped)

Element houses

PAINTED

- elements from outside
- doors and windows (painted from outside and inside)
- external slats from all sides

NOT PAINTED

- elements from inside
- floor boards
- roof boards
- rafters, purlins
- all the details seen inside of the house
- foundation beams (brown dipped)

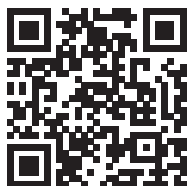

You will find available treatment options next to each product under Treatment Options section. Please get familiar with the article number and description of the treatment we offer as follows:

LEMEKS GROUP

Bringing joy to the garden

Palmako AS is the leading manufacturer of garden and log houses, glue-laminated products and wood pellets. Our product range is wide: square log garden houses, garden cabins, garden sheds, pavilions, carports, tool sheds, children's playhouses, weekend and living houses. We also offer a wide choice of timber products in your garden – fence panels, posts and poles, wooden furniture and log rolls.

Catalogue models are kept in stock year-round for quick delivery throughout the world. Our products are well known for their quality because we use the best raw material available: durable and beautiful Nordic spruce. Palmako is FSC certified and products made from FSC timber have been marked accordingly.

27 years of experience in wood industry has made us one of the leading companies in this area in Europe today.
